

25t ABSOLUTE CABLE ANCHOR - MECHANICAL

The 25t Absolute Cable Anchor, Mechanical – is a $\varnothing 15.2$ (depicted below) flexible steel strand with a shell anchor located at the dead end of the strand that anchors the strand into the hole.

A square sealing sponge, 125 x 125 x 8mm washer, breather and filler pipes and an AMS Compact barrel with wedges are used to lock it off and tension the strand to a pre-determined limit at the live end of the anchor.

Complete Anchor

Dead or Back end of Anchor

Live or Front end of Anchor

25 ABSOLUTE CABLE ANCHOR MECHANICAL

ADVANTAGES:

- a. The cable anchor can be designed for any length support hole and can be fitted with shell anchors of different diameters to accommodate larger or smaller diameter holes. Coloured breather pipes are used to identify the length of the anchor.
- b. By using the filler and breather pipes the cable anchor can be full column grouted.
- c. Uses the patented AMS Barrel technology to give both an audible and visual check that the anchor has been correctly tensioned.
- d. Is easily fitted and supplied with the GET System (Grout Efficiency Tester).
