

iSober Breathalyser Cloud Improve safety. Reduce risk.

iSober Breathalyser Cloud allows drivers to capture breathalyser tests autonomously, enabling fleet operators and business owners to oversee test results from a central dashboard.

All-in-one breathalyser platform for Enterprise

The iSober App and Cloud service is a cutting-edge bluetooth breathalyser test management platform for day-to-day capturing, sharing, tracking and storage of breathalyser test data for social users, drivers, business owners, fleet operators and virtually anyone who has a truck, bus or vehicle who needs to test drivers remotely without having to physically test the user themselves. Fleet and business owners are able to prompt their drivers in remote locations to perform breathalyser tests on themselves where the test data then becomes available in real-time for sharing and analysis.

Exact test location

Test results are stored with the precise GPS location and the nearest physical address.

Chain of evidence

Test results are stored against the unique breathalyser serial number allowing traceability for each test.

Precise timestamps

Test results are stored alongside the exact date and time that the measurement was taken.

Proof of identity

Test results are stored alongside a photo taken on the user's mobile phone.

Notification alerts

Configure customised push notifications to alert when a user records a positive measurement.

Measure others

Test a user other than the currently signed in user and add supporting notes.

Social sharing

Breath alcohol test results can be shared by Email, WhatsApp, iMessage, Facebook and Google from the iSober App

Manage test results

Full measurement history is saved securely for each driver and can be managed and recalled in iSober Breathalyser Cloud.

Benefits for insurers

Reduced risk

Embedding regular alcohol testing within businesses greatly reduces the risk that drivers begin journeys while under the influence of alcohol.

Faster claims process

Alcohol tests taken when journeys start helps to prove or disprove the presence of alcohol as a contributing factor.

Third party claims

Producing a negative breathalyser test can provide important evidence with regard to third party insurance companies.

Opportunity to innovate

Breathalyser test data combined with trip data provides valuable insight that can be used when pricing risk for customers.

Benefits for fleets and business

Drivers are required by their employers to test their breath alcohol before setting off and upon completing their journeys. Managers have oversight of testing and test results within their organisation from a real-time dashboard.

- Reduced risk of drink driving incidents
- Random spot tests to keep drivers accountable
- Potential to reduce excess and premiums

Benefits for motorists

Drivers are encouraged to test their breath alcohol before every journey, and are able to share test results with friends and family to give them peace of mind.

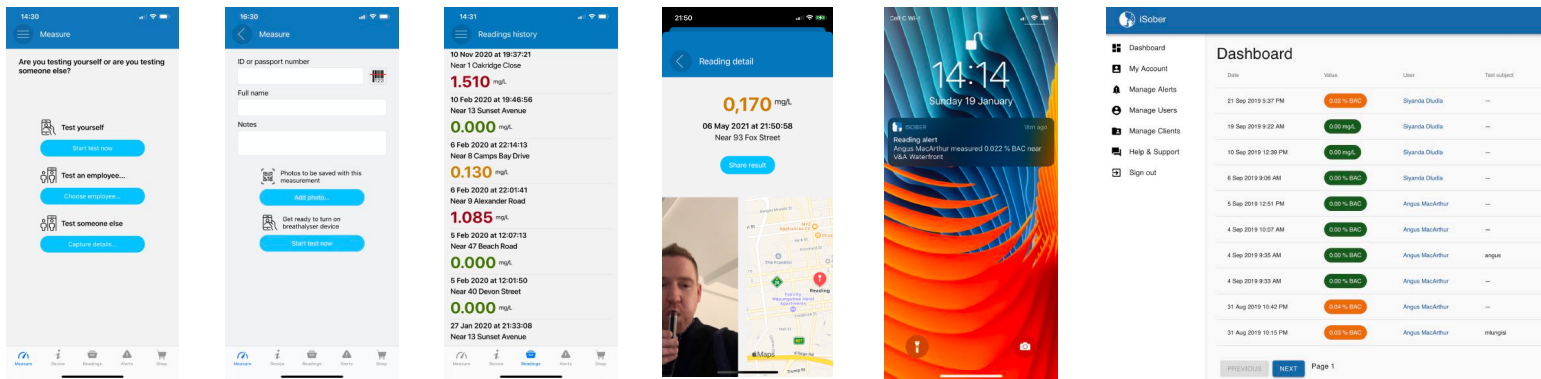

- Greater awareness about breath alcohol level
- Encourage safe sober driving
- Potential to earn loyalty points for being sober
- Sober drivers are safe drivers #ArriveAlive

How iSober works

Drivers use the the iSober app, which is available on iOS, Android and Huawei platforms, together with a supported Bluetooth breathalyser device. Measurements are uploaded securely to iSober in the cloud where they can be accessed by authorised users.

Measurements are securely uploaded to iSober in the cloud together with metadata such as:

-  Breath alcohol content
-  GPS coordinates
-  Date and time
-  Test another person
-  Calibration status
-  Nearest address
-  Photo with watermark
-  Additional notes

API Integration

iSober Breathalyser Cloud supports custom-development to integrate with external systems so that breath alcohol measurements can be used to complement existing data streams in other platforms and systems.

Supported Devices

iSober works with the following Bluetooth breathalyser devices which are suitable for different customer applications and market segments. Each device carries the CE mark and ICASA approval.

Alcoscan AL8800BT Compact Breathalyser

Fully portable breathalyser designed for use in the workplace and as a high-end personal breathalyser. Annual calibration required.

iSoberS Pro BLE Premium Breathalyser

Fully portable breathalyser designed for use in the workplace and as a high-end personal breathalyser. Provides onboard memory of the last 100 tests. Annual calibration required.

Alcoscan ALP1 BT for industry and law-enforcement

Fully portable breathalyser designed for Industry and law enforcement. Can operate both in a passive no-mouthpiece fast mode for quick road side testing or for entry point screening. Annual calibration required.
