MANDELA MINING PRECINCT
MINDS FOR MINES

Mining Equipment Manufacturers of South Africa (MEMSA), an industry cluster established in 2016 with the support of the Department of Trade, Industry and Competition (dtic), works hard to build a competitive advantage for South African mining equipment manufacturers by providing access to key markets and championing existing and future local technology and innovation.

As the **principal local South African mining equipment manufacturing cluster** we are recognised by the Department of Minerals Resources and Energy (DMRE), the Department of Science and Innovation (DSI) and the Minerals Council of South Africa (MCSA).

MEMSA is located in the heart of the **CSIR** managed **Mandela Mining Precinct**, and the three bodies subsequently benefit from a close working relationship.

OUR PARTNERS

BENEFITS TO THE INDUSTRY

COMPETITIVE COLLABORATION IN AN INDUSTRY CLUSTER

Strength in Numbers

As a cluster MEMSA **provides a collective identity and position of strength** for South African mining equipment manufacturers by increasing industry cohesion, reputability and market access.

Your Network is your Net Worth

Joining our cluster will allow you to connect with key decision-makers in government and private business, tap into exclusive industry networks and associated projects, as well as a wealth of high-tech IP and cutting edge technological advancements.

A Brains Trust

We are **driving technology development in the South African mining equipment sector** through our collaboration with a range of innovation partners.

These include the Minerals Council of South Africa (MCSA), the Mandela Mining Precinct and the related South African Mining, Extraction, Research, Development and Innovation (SAMERDI) programmes.

These ground breaking initiatives are poised to drive mining industry research and innovation into the future and include:

- The Test Mine Project
- Collision Prevention Systems (CPS) Working Group
- The 4IR Interest Group
- MEMSA IP Awareness Initiative

Market Access

- Through the Africa Trade Group, MEMSA and our sister cluster SAMPEC, collaborate with the dtic to promote trade and investment in key African markets
- MEMSA members have exclusive market exposure through the Mandela Mining Precinct's Technology Availability & Readiness Atlas (TARA) online database. This 'search engine' for locally manufactured equipment and technology is also actively marketed to the mining industry

Information and Resources

- Quarterly industry newsletter and regular updates on events and opportunities
- Member-only information resources on the MEMSA website
- Informative webinars on topics such as 4IR Technologies, Incentives, Investment Opportunities and Transformation
- Bi-Monthly Market Research Bundle

Innovation & New Technology

- Updates and shared reports on SAMERDI and CSIR research studies and opportunities for members to participate in these programmes
- Technology interest groups to explore possible areas for collaboration and information sharing
- Annual MEMSA Innovation Awards

Top Level Networking & Partnerships

- Annual Golf Day
- Annual MEMSA Manufacturing Awards
- High level access to public and private institutions including dtic, IDC, DSI, DMRE and merSETA Metals Chamber

JOIN MEMSA TODAY

WE INVITE QUALIFYING COMPANIES
TO BECOME MEMBERS

- South African manufacturers of mining equipment with minimum 26% local (SA) ownership and BEE compliant.
- Committed to achieving BEE Level 4, 26% black ownership, 60% local content and 100% local RDI which means the retention of local Intellectual Property and the creation of more jobs.
